HEADER 28x2

Install Q2, R3 and R4 for automatic transmissions only. Also the 4th gear pressure switch output must have #12 while in 1,2,3 & rev gear. On when in 4th (OD). This inhibits TC lockup until in OD. TCC Control 2nd note if the TCC control is routed through a 4th gear pressure switch inside the transmission (END USER responsible to check) that allows TCC operation only in 4th gear then delete R3, R4 and Q2.
